

KIPP World Headquarters, Germany

## THE RELIABLE “GO TO” COMPANY FOR ALMOST 100 YEARS!

From the humble roots of a small mechanic’s workshop almost 100 years ago, KIPP today enjoys a world leadership position in the manufacturing of precision tooling components; including handles, knobs, spring plungers, clamping and workholding elements, handwheels and more.

In fact, the name KIPP is virtually synonymous with adjustable handles that KIPP introduced six decades ago.

With over 16,000 standard stock parts in this catalog, we can typically satisfy your needs within 24 hours.

# Manufacturer competence

## WHERE FASHION AND FUNCTION ARE IN HARMONY

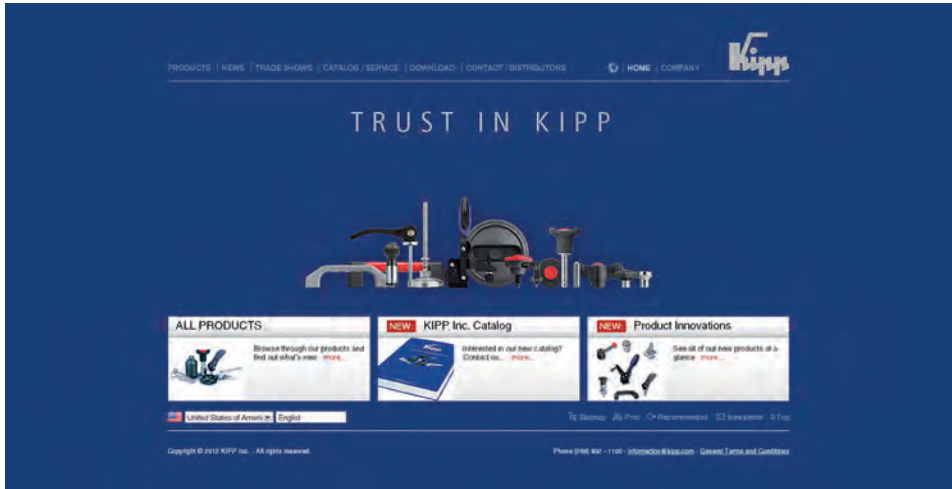

The best in CAD design, engineering and contemporary technology comes together in each and every KIPP product. More than just precision and high quality, styling is of equal importance to us. KIPP products offer a fashionable addition to every application for many different industries. If the component looks good and works great, chances are **It's A KIPP!**

## ULTIMATELY IT'S ABOUT PEOPLE

KIPP's uncompromising commitment to quality, style and service is reflected in the attitude of our People. Their dedication to producing the very best at all stages of design, production, distribution and customer service is exactly what you should expect from a world-class organization.

## NEW DESIGN

We have completely revised the KIPP internet presence. In the future you will find the desired products, sizes, delivery quantities and CAD data for downloading intuitively and as quickly as possible.

## NEW FUNCTIONS

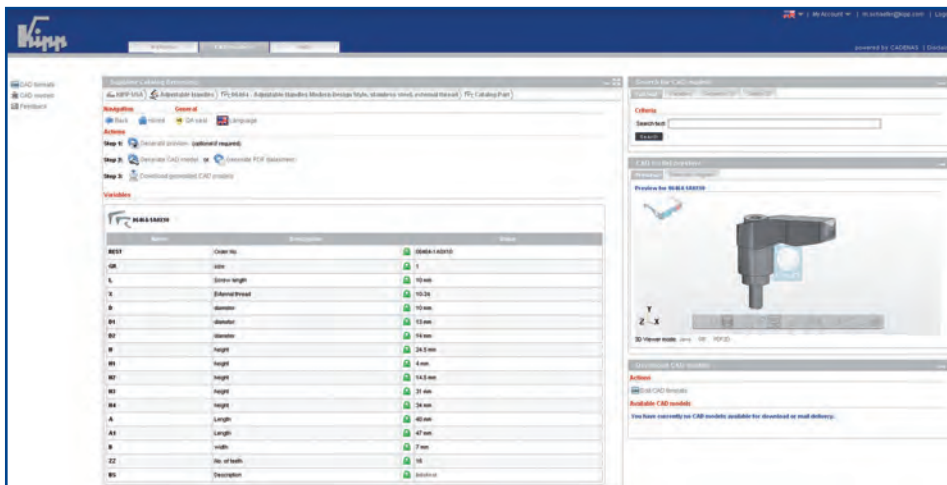

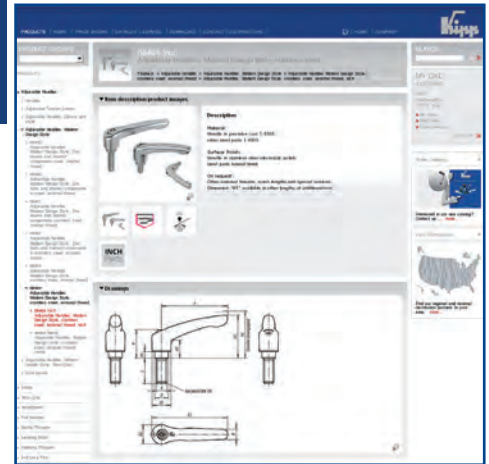

Practical datasheet generation and filter function for a quick selection of the best part to meet your requirements. A new Callback feature – a KIPP representative will contact you.

## CAD DATA

It is now possible to download the 2D and 3D CAD data immediately with the selected product. Simply register.

Then this service will be available to you every time you log in.

It will of course continue to be possible to order the KIPP CAD library on a data storage medium.
